How do I set up a solar roof?

Take the time to properly think through and set up your project before beginning. First, check that your property is suitable for a solar power system. Your roof needs to have enough surface area for the panels required to supply your energy needs. You also need plenty of sun exposure, so you may need to cut trees or branches.

Do solar panels need an inverter?

The necessary wiring will run through them to connect the panels to the electrical system. Since solar panels generate DC power, you'll need to use an inverter to convert the energy to AC power for your home. Some systems use a central inverter, but these have a major drawback: if one panel malfunctions, the rest of the array can also go down.
