

Photovoltaic panel installation apprentice recruitment

Are there apprenticeship programs for solar photovoltaic installers?

Although there are currently no apprenticeship programs for solar photovoltaic installers, some learn PV installation through other occupational apprenticeship programs. Electrician and roofing apprentices and journey workers may complete photovoltaic-specific training modules.

What does a solar installer do?

A solar installer is the company people hire to install solar panels on their homes and businesses. That might seem fairly simple, but there is a lot that goes into planning and finishing the project. Keep scrolling to learn a little about why solar rocks, the typical jobs that we have, how to get trained, and what it's like to work in solar.

Are solar installation companies growing?

That means that solar installation companies like A&R Solar are growing too and hiring more workers. But let's back up. A solar installer is the company people hire to install solar panels on their homes and businesses. That might seem fairly simple, but there is a lot that goes into planning and finishing the project.

What is the solar Jobs Strategy Commission?

The Solar Jobs Strategy Commission will encourage greater collaboration and information exchange between solar employers, training institutions, workforce investment boards, and solar job candidates.

How do I become a solar tech?

In some states like Washington, you can earn enough hours as a solar tech to obtain an electrician's license (after some coursework and testing). Warehouse and purchasing team members make sure that the crews have everything they need to install solar at a customer's house.

Who is responsible for connecting solar panels & inverters to a building?

Electricians are responsible for connecting the solar panels, inverter, and other electrical equipment to a building's power supply.
