

Photovoltaic panel maintenance recruitment

What does a solar photovoltaic installer do?

Solar photovoltaic installers are key to the process of solar panel installation and maintenance. They use specialized skills to install residential and commercial solar projects. They are responsible for safely attaching the panels to the roofs of houses or other buildings and ensuring that the systems work.

What is the solar ready vets network?

The Solar Ready Vets Network is a group of solar workforce development programs for veterans and transitioning military service members. Solar Career Map developed by the Interstate Renewable Energy Council (IREC). Use the Solar Career Map to explore 40 jobs across four industry sectors and identify more than 60 routes to advancement between them.

What skills does a solar photovoltaic installer need?

Solar photovoltaic installers must be able to work with power tools and hand tools at great heights, and possess in-depth knowledge of electrical wiring as well as basic math skills. When necessary, installers must be problem solvers, able to repair damaged systems or replace malfunctioning components.

What is the difference between a lead PV installer & a residential service technician?

Lead PV Installers are the solid core of the solar industry. They set up and maintain the sophisticated equipment and wiring that connects a solar energy system to the electrical grid. Residential Service Technicians are quality assurance professionals who monitor, diagnose, optimize, and repair underperforming PV systems.

Do plumbers & electricians work on solar installation projects?

Plumbers and electricians working on solar installation projects must also have specialized training on the systems that they will be installing, or they must work under the supervision of a qualified solar photovoltaic installer.
